Methodology

Values in this document are estimated from real Discogs marketplace sales data for each specific pressing, adjusted for condition grade. Figures are a point-in-time snapshot as at 5 Aug 2026.

Each estimate is keyed to the record's media condition grade. Where a record is ungraded, VG+ is assumed. A small number of records without per-condition sales data are estimated from the lowest current marketplace listing, adjusted for condition. Sleeve condition is documented but does not affect the estimate. Records with no available market data are shown with a dash and excluded from the total.

Underlying sales data is USD based; values are shown in AUD, converted at USD/AUD 1.4210 on 5 Aug 2026.

Grading key

Condition is assessed by the owner using the Goldmine standard.

GRADE		MEANING
M	Mint	Perfect. Appears unplayed
NM	Near Mint	Nearly perfect, no visible wear
VG+	Very Good Plus	Light wear that does not affect play
VG	Very Good	Noticeable wear and light surface noise
G+	Good Plus	Heavy wear, plays through without skipping
G	Good	Significant wear and surface noise
F	Fair	Barely playable
P	Poor	Damaged; kept for completeness
Generic		Plain unprinted sleeve (sleeve only)
None		No sleeve (sleeve only)

Documentation levels

- **Full** graded, photographed, and purchase details recorded
- ◐ **Detailed** graded, with photographs or purchase details
- **Basic** catalogued

Collection summary

7 M · 37 NM · 35 VG+ · 22 VG · 6 G+ · 1 G · 9 ungraded

Limitations

Values in this document are estimates derived from marketplace sales data and are not guarantees of realisable value. Condition is assessed by the owner using the Goldmine standard. This document is a record of the collection as documented in Groovv on 5 Aug 2026 and is not a professional opinion of value. Collections change; regenerate periodically to keep documentation current.
